

## OVERVIEW

The VS01E is a patented 2 x 4 lighting troffer with a UV-C air treatment system. The VS01E uses energy efficient T8 fluorescent lamps to provide high efficiency area illumination.

The VS01E draws in untreated air, pushes it through a highly reflective UV chamber with an ultraviolet light set at the wavelength of 253.7 nanometers which inactivates bacteria or fungi that passes over the lamp. Four fans continue to push the air through the unit at approximately 50 cfm. This allows the unit to treat the equivalent of one full volume of air from a typical 10 x 10 room with 8 ft. ceilings four times an hour. The system works 24/7/365.
